

取消 EconoMode 設定方法

為節省碳粉，電腦教室印表機預設為經濟模式，在此模式下會以較淡的墨色列印，且影像品質較差。一般文件列印時，建議使用預設值即可。若需要較好品質列印，請手動將經濟模式取消，方法如下：

The image shows two windows from the HP printer software. The top window, titled '列印' (Print), shows the printer 'HP LJP3005-B' and a '內容' (Content) button circled with a black line. A callout points to this button with the text '1. 列印時選取「內容」'. The bottom window, titled 'HP LJP3005-B 文件 內容', shows the '紙張/品質' (Paper/Quality) tab selected. In the '列印品質' (Print Quality) section, the 'EconoMode' checkbox is circled with a black line. A callout points to this checkbox with the text '2. 點選「紙張/品質」標籤' and '3. 取消勾選「EconoMode」'. The checkbox is currently unchecked, and the text below it says '可以節省耗材' (can save materials).

1. 列印時選取「內容」

2. 點選「紙張/品質」標籤

3. 取消勾選「EconoMode」
